EXAMINER'S AMENDMENT

1. As per the Office action filed 25 May 2005, claims 9-20 are being canceled because Applicant did not take action to so do within the 1-month period. The claims 9-20 should have been canceled by 25 June 2005.

The application has been amended as follows:

Claims 9-20 are canceled.

Allowable Subject Matter

2. Claims 1-5, 7 and 8 are allowed.

3. The following is an examiner's statement of reasons for allowance as repeated from the Office action filed 25 May 2005:

The claims are considered allowable to the extent that Applicant's argument in the Appeal Brief are correct in regard to the following: even though some steps recited in the method are optional, that the applied art must be capable of performing all of the steps in the sequence provided is required. In this regard, the applied art does not teach or suggest, in the context of the claim, that the both the temperature and flow rate of the coolant flowing through the wafer chuck must be adjusted to control the temperature of the wafer before the process energy is adjusted to control the temperature of the wafer. (See Appeal Brief filed 31 January 2005, pp. 6-7.) Again, to the extent that Applicant's argument is correct that optional method steps (i.e. those steps **not** performed because the temperature of the wafer is within the desired range) make the method patentably distinct from the applied art of record, the claims 1-5 and 7-9 are considered allowable.
